BUSINESS HISTORY:

Swine Farms:

- **Swine Genetic**
- **Largest Midwest Genetic Single Source of Weaner Pigs**
- **Major Contractor with Multinational Food Corporations**

Tai Farms of Tennessee, Inc. - Somerville, TN
6000 Sows, Farrow to Finish

Jade Farms of Kentucky, Inc. - Princeton, KY
1500 Sows, Farrow to Finish - 3 facilities

Tai Finishers, Inc. - Tennessee, Ohio, Indiana, Alabama, Kentucky, Mississippi

150,000 Finishing per year, Contract facilities

Sold to a major Multinational Food Conglomerate

Manufacturing Plants:

Oxyzone System, Inc. - Somerville, TN
Manufacturing Patented Odor control equipments for Industrial and Agricultural use
Distribution - Through Dealerships

Rhema Products, Inc. - Somerville, TN
Manufacturing State of the Art 21st Century new generation cleaning solution products
for Industrial, Commercial, and Household use
Customers: Federal Express, CraftsAmerica, Private label, International
manufacturing and Marketing companies.

MAJOR RESEARCH AND PRODUCT DEVELOPMENT PROJECTS:

CANCER THERAPY –

Treatment and Prevention of Cancer using alternative supplements and proprietary formulation causing cancer cell apoptosis and self regulation. In Vitro, animal laboratory and clinical trial studies shown effectiveness against all types of cancer cell, even those resistant against present traditional chemotherapy and radiation therapy. Furthermore, crosses brain barrier, readily absorbed by mouth and has no known side effects.

PAIN THERAPY –

Formulation & Delivery System - Clinical trial studies on effectiveness of Topical Cream for local pain and inflammatory relieve using new technology of Active Delivery System crossing Dermal Barrier. Applications in arthritis, injuries, and localized inflammation.

BIODEGRADABLE PLASTIC -

New Formulation, State of the Art Biodegradable Plastic that meets world's Biodegradable standard. Concentration in polymer film manufacturing of plastic bags that are Biodegradable in 6 months or less into Carbon Dioxide and water.

SUPERFUND CLEAN UP –

New products and technologies directed to environmental clean ups of hazardous material contained in SUPERFUND, i.e. PCB. This new patent pending cleaning process and technology applies to environmental spills, contamination, and disposal system.

ANTI-AGING –

Formulation and Delivery System of new fractional compound as a natural supplementation and intrinsic hormonal production for anti-aging and restoration of youth, improving the mechanism of new DNA - Telomere viability.

SPORTS MEDICINE –

New natural supplemental compound for athletes and body builders to attain fast and consistent bulk up of muscle mass, dramatic increase in power output through new glycogen transport pathways, and diminished recovery time after work out and major sporting events through improving anabolic protein mechanism.

FOOD PRODUCT –

Technology transfer of the equipment and proprietary process of manufacturing a world quality Instant Flavored Rice that retains all natural nutritional value, flavor, and texture of natural cooked rice. No added preservatives or chemicals. No cooking utensils. With only the addition of water and few minutes the product is ready to serve. Worldwide market in domestic, Institutional, military, emergency and disaster, survival and camping, and of course, for those college students burning the midnight oil.
