To whom this may concern:

I had heard about the work of Dr. Tai through the medical community, and was very pleased to have had the chance to speak with him about his protocol for cancer and for multiple sclerosis. It was obvious to me after our phone call, that Dr. Tai is a very distinguished professional. He is a highly experienced surgeon with great knowledge of conventional medical practice. But he is also an inventor of natural solutions to many diverse health problems, and a published author.

What struck me even more clearly was Dr. Tai's humanity and concern for those suffering from various serious ailments seeking his assistance. Dr. Tai is a rare and humble practitioner of the healing arts, and his sincerity in his desire to help others to heal was profoundly evident.

My father in law has suffered from M.S. for many years. Before he came to visit from Germany, he could only walk indoors with a walker, could not handle stairs and could no longer walk outside. During his visit, I decided to try Dr. Tai's protocol. Dr. Tai said he often had patients up and walking in ten days. At the time, I had difficulty believing this could be possible, as usually everything in medicine takes time before results can be observed. After two weeks, when my husband's father was ready to return to Germany, he was able to walk inside without any assistance and climb stairs with his cane, fairly easily. What was even

more remarkable is that he was able to walk a long block outside in winter weather pushing his wheel chair. Additionally, he actually walked downstairs and played ping pong with my husband. His results were nothing short of amazing. I could barely believe my eyes, as I could measure his progress daily.

My father in law is like a new man. He walked to the bank with his cane yesterday and has joined a health club to build up his muscle tone. His outlook is now positive and strong, after his feeling hopeless for so long. I truly see this as a medical miracle, and we will always be forever indebted to Dr. Tai. Friends in Germany are asking how they can order his remedies.

We are now beginning Dr. Tai's protocol for my uncle with metastatic prostate cancer. Judging from my father in law's incredible comeback, I am very hopeful Dr. Tai's cancer protocol will be equally effective. Seeing is believing, and my father in law's recovery has been one of the most important events I have ever witnessed in my experience thus far in medicine.

Sincerely,

Dr. Theresa Gregory
