3-Step Program

AcneDerm Cleanser → AcneDerm Gel → AcneDerm Urgent Care

To have a clear skin, it can be as simple as 1-2-3 :

1. Use **AcneDerm Cleanser** to wash face or affected areas AM and PM massage and scrub skin for one to two minutes and rinse off.
2. Apply a thin layer of the **AcneDerm skin Gel**. Allow the AcneDerm Skin Gel to dry into the skin.
3. Apply a small amount of **AcneDerm Urgent Care** to pimples only, twice daily.

You will see a clear skin in 4 weeks. It is advisory to use it up to 8 weeks for a significant effects.

4-Power Action

- **Attacks** pustules - Kills P. Acne bacteria that cause acne pustules
- **Attacks** inflammation - Anti-inflammatory
- **Reduces** hormone level on the skin
- **Attacks** Oiliness - Diminishes oiliness of the skin

To: Paul Tai DPM
Health Secrets USA

I am a Board certified Dermatologist, and a graduate of Yale Medical School. I have done a clinical evaluation of your AcneDerm Cleanser, Gel, and the Urgent Care products on my patients, and am very impressed with the clinical results on numerous patients with different acne conditions. I can say with confidence that your products work better and more effectively than all the over the counter products and is similar in efficacy to the topical prescription medications that I prescribe in my practice.

In patients with pustular acne, I have noted significant improvement starting at 4 weeks, where as most topical prescription medications would take up to 12 weeks to see noticeable results. More importantly, your AcneDerm products do not dry the skin like most over the counter or prescription products. It is really a great feature that my patients particularly enjoy!

Base on my clinical experiences, it is my opinion that AcneDerm1 is even superior to Proactiv. I can definitely and highly recommend AcneDerm products to anyone who has an acne condition.
